The concept of this project was to create a public space which is Aquatic center, and for that we wanted it to be integrated in the site, by following the form of the existing buildings on the actual site and by using the principles of Modernism, Minimalism and the quote "Less is more" by Ludwig Van de Riche.

An aquatic center is a facility that offers a variety of water-based activities and amenities. These can include swimming pools, water slides, diving boards, lazy rivers, wave pools, and sometimes fitness centers and spa "in and out". Creating a sense of adventure and wonder making the aquatic center a memorable experience for visitors of all ages.

Indoor/Outdoor Integration: Design the center with a seamless transition between indoor and outdoor spaces, allowing for flexibility in usage and maximizing natural light and ventilation.

The Line Of Connection

In a world where boundaries define and confine, our marina project envisions a singular, unifying line that transcends the ordinary. This line, drawn from the soul of Cyprus, serves as a living thread weaving through the fabric of our design. It bridges the diverse vistas of Cyprus, knitting together residential enclaves, bustling commercial hubs, serene marine spaces, vibrant restaurants, and inviting recreational areas.

Concept

- 1 A red line marks the main axis connecting the marina to the city's road network.
- 2 Lines extend from key landmarks like Bella Pais, Saint Hilarion, and the Beshparmak mountains.
- 3 The marina's layout shows designated areas for various functions, guided by these lines.
